The web-enabled clock is the internet connected alarm clock.

This website allows you to create you own custom wake-up ritual that will run on your web-enabled clock. You can stream audio from any source onthe web, hear news items of interest or be alerted to appointments from your own day planning software, as you wake up.

To build your own personal wake-up routine, fill out the form below:

First Name	Last Name	Web-enabled clock serial number
<input type="text"/>	<input type="text"/>	<input type="text"/>
password	Address	
<input type="text"/>	<input type="text"/>	
	<input type="text"/>	
	State <input type="text"/>	Zip <input type="text"/>
	email <input type="text"/>

Preset wake-up
program for web-enabled
clock user

When you set up your web-enabled clock using this Preset mode, you simply choose content you would like to hear from the selections below. The web-enabled clock server plays them for you at your wake-up time. To select the order or to choose from a larger selection of content, use the Custom Setup Application.

Start Wake-up am ☒ pm ☐
